FOR FURTHER ACTION

See paragraph 2 below

International application No.

PCT/US04/14514

International filing date (day/month/year)

10 May 2004 (10.05.2004)

Priority date (day/month/year)

09 May 2003 (09.05.2003)

International Patent Classification (IPC) or both national classification and IPC

IPC(7): H04N 7/173, 7/16 and US Cl.: 725/126,133,142

Applicant

BROADBAND INNOVATIONS, INC.

1. This opinion contains indications relating to the following items:

- ☒ Box No. I Basis of the opinion
- ☐ Box No. II Priority
- ☐ Box No. III Non-establishment of opinion with regard to novelty, inventive step and industrial applicability
- ☐ Box No. IV Lack of unity of invention
- ☒ Box No. V Reasoned statement under Rule 43bis.1(a)(i) with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement
- ☐ Box No. VI Certain documents cited
- ☐ Box No. VII Certain defects in the international application
- ☐ Box No. VIII Certain observations on the international application

2. FURTHER ACTION

If a demand for international preliminary examination is made, this opinion will be considered to be a written opinion of the International Preliminary Examining Authority ("IPEA") except that this does not apply where the applicant chooses an Authority other than this one to be the IPEA and the chosen IPEA has notified the International Bureau under Rule 66.1bis(b) that written opinions of this International Searching Authority will not be so considered.

If this opinion is, as provided above, considered to be a written opinion of the IPEA, the applicant is invited to submit to the IPEA a written reply together, where appropriate, with amendments, before the expiration of 3 months from the date of mailing of Form PCT/ISA/220 or before the expiration of 22 months from the priority date, whichever expires later.

For further options, see Form PCT/ISA/220.

3. For further details, see notes to Form PCT/ISA/220.

WRITTEN OPINION OF THE
INTERNATIONAL SEARCHING AUTHORITY

International application No.

PCT/US04/14514

Box No. I Basis of this opinion

1. With regard to the language, this opinion has been established on the basis of the international application in the language in which it was filed, unless otherwise indicated under this item.

☐ This opinion has been established on the basis of a translation from the original language into the following language _____, which is the language of a translation furnished for the purposes of international search (under Rules 12.3 and 23.1(b)).

2. With regard to any nucleotide and/or amino acid sequence disclosed in the international application and necessary to the claimed invention, this opinion has been established on the basis of:

a. type of material

☐ a sequence listing

☐ table(s) related to the sequence listing

b. format of material

☐ in written format

☐ in computer readable form

c. time of filing/furnishing

☐ contained in international application as filed.

☐ filed together with the international application in computer readable form.

☐ furnished subsequently to this Authority for the purposes of search.

3. ☐ In addition, in the case that more than one version or copy of a sequence listing and/or table relating thereto has been filed or furnished, the required statements that the information in the subsequent or additional copies is identical to that in the application as filed or does not go beyond the application as filed, as appropriate, were furnished.

4. Additional comments:

WRITTEN OPINION OF THE
INTERNATIONAL SEARCHING AUTHORITY

International application No.
PCT/US04/14514

Box No. V Reasoned statement under Rule 43 bis.1(a)(i) with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement

1. Statement

Novelty (N)	Claims <u>NONE</u>	YES
	Claims <u>1</u>	NO
Inventive step (IS)	Claims <u>NONE</u>	YES
	Claims <u>1</u>	NO
Industrial applicability (IA)	Claims <u>1</u>	YES
	Claims <u>NONE</u>	NO

2. Citations and explanations:

Claim1 lacks novelty under PCT Article 33(2) as being anticipated by ReplayTV manual.

ReplayTV discloses a method for providing television services from a headend to subscriber premises comprising the steps of:

Receiving by a first subscriber terminal (first ReplayTV unit) via a first transmission link (coaxial cable input 2, page 5) that is coupled to the first subscriber terminal, a first television service transmitted from the headend (content which has been recorded, pages 49-50),
And

Transmitting system information data specifying attributes of at least one local television channel (pages 49-50, replay channels and recorded shows) to a second subscriber terminal (second ReplayTV unit) coupled to the first subscriber terminal via a second transmission link (network cable coupled to Ethernet port 13, pages 5, 12, 49-50), wherein at least one local television channel has a frequency that is unused on the first transmission link by the headend (transmission takes place over network cable coupled between the networked ReplayTV units)

Transmitting the first television service by the first subscriber terminal, an one of at least one local TV channel (pages 49-50, programs stored on first unit), via the second transmission link (network cable coupled between Ethernet ports 13) to the second subscriber terminal that is located at the subscriber premises.

Claim1 lacks an inventive step under PCT Article 33(3) as being obvious over the ReplayTV manual.

ReplayTV discloses a method for providing television services from a headend to subscriber premises comprising the steps of:

Receiving by a first subscriber terminal (first ReplayTV unit) via a first transmission link (coaxial cable input 2, page 5) that is coupled to the first subscriber terminal, a first television service transmitted from the headend (content which has been recorded, pages 49-50),
And

Transmitting system information data specifying attributes of at least one local television channel (pages 49-50, replay channels and recorded shows) to a second subscriber terminal (second ReplayTV unit) coupled to the first subscriber terminal via a second transmission link (network cable coupled to Ethernet port 13, pages 5, 12, 49-50), wherein at least one local television channel has a frequency that is unused on the first transmission link by the headend (transmission takes place over network cable coupled between the networked ReplayTV units)

Transmitting the first television service by the first subscriber terminal, an one of at least one local TV channel (pages 49-50, programs stored on first unit), via the second transmission link (network cable coupled between Ethernet ports 13) to the second subscriber terminal that is located at the subscriber premises.
